This Summary of Grants is divided into 3 separate categories. The purple grants are research grants that were given to institutions to research topics in educational technology. The blue grants are content grants and were given to different institutions to develop content that could be taught online or through other means of e-learning. The green grants are faculty development grants and were given to faculty to design courses, redesign courses, or explore topics in educational technology. The grant funds listed on this document are shown in the year in which OLN gave out the money, not necessarily when it was used by the institution. Therefore, some discrepancies exist between the amount that was distributed and what was actually spent by the institutions at the point this summary was compiled (e.g., Learning Communities 2006 and 2007).
